Power Moves

Short prompts that sharpen goals, test plans, and check the AI's work.

USE IT WHEN You want more precision and control, or you need to trust an output before you send it.

THE MOVES

1 Goal alignment

Get the AI to question you until your objective is clear and actionable.

2 Agent creation

Borrow a domain expert for a specific task.

3 Workflow builder

Turn a fuzzy task into numbered, repeatable steps.

4 Stress test

Let a skeptical critic probe your plan one question at a time.

5 Self-check

Make the AI review its own work before you use it.

COPY AND FILL IN

```
GOAL: Ask me questions one at a time until my goal is clear.
EXPERT: Act as an expert in [field]. Guide me step by step.
WORKFLOW: Break [task] into numbered steps. Flag decisions.
STRESS TEST: Act as a skeptical critic. Challenge my plan.
SELF-CHECK: Review your answer. List assumptions, gaps, and
claims to verify. Then improve it.
```

Most underused move

The Self-Check prompt. Paste it after any important answer and the AI will name its own assumptions, gaps, and claims to verify.
